DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 480. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of

Art Unit: 2634

the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 5-7, 13, 17-18, and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Liu(US Pat# 6,470,053). Liu discloses a DSL transceiver using a line driver to be used on a twisted pair wire. More specifically, Liu meets the following limitations of claim 1:

a transmit circuit coupled to a line driver/transformer circuit ; and **fig 2, item 206; See also figure 3.**

a receive circuit coupled to the line driver/transformer circuit, the receive circuit comprising a switching circuit, the switching circuit enabling operation of the DSL transceiver for DSL applications. **{Fig 3, item 318; (Column 2, lines 3-16) for use in DSL systems; (Column 6, lines 25-34) explains switching}**

Moreover, the switching circuit is used to flip between the receiving and transmitting operation of the transceiver for enabling DSL communication. It is also shown that the transmit and receive circuits are coupled to the switch in figure 3.

Regarding Claim 5, the use of a switch is inherent in a switching circuit.

Regarding Claims 6-7, applicants admits to the features of these claims as prior art in Fig 1B, items 126-127, and Pg. 6, lines 1-11.

Regarding Claims 13, 17-18, and 20 the rejection for Claim 1 above meets the limitations of the Claim.

Allowable Subject Matter

3. Claims 2-4, 8-12, 14-16, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
